

# TABLE OF CONTENTS

<b>Preface</b>	vii
<b>Selected Symbols List</b>	xxii
<b>CHAPTER 1</b>	
<b>Griffith-Inglis Crack &amp; Zener-Stroh-Koehler Crack</b>	1
1.1. Griffith-Inglis Crack	2
1.2. Stress Fields of Griffith-Inglis Cracks	5
1.2.1. <i>Mode I Stress Field</i>	6
1.2.2. <i>Mode II Stress Field</i>	7
1.2.3. <i>Mode III Stress Field</i>	14
1.2.4. <i>Mode I Near Tip Stress Field</i>	14
1.2.5. <i>Mode II Near Tip Stress Field</i>	16
1.2.6. <i>Mode III Near Tip Stress Field</i>	16
1.3. Elastic Displacement Fields of Griffith-Inglis Cracks	17
1.3.1. <i>Mode I Near Tip Elastic Displacement Field</i>	18
1.3.2. <i>Mode II Near Tip Elastic Displacement Field</i>	18
1.3.3. <i>Mode III Near Tip Elastic Displacement Field</i>	18
1.4. Fracture Stress of Griffith-Inglis Crack	18
1.4.1. <i>Energy Method</i>	19
1.4.2. <i>Critical Crack Tip Displacement Method</i>	22
1.4.3. <i>Dislocation Method</i>	23
1.4.4. <i>Stress Intensity Factor</i>	24
1.4.5. <i>J Integral</i>	25
1.4.6. <i>Short Griffith-Inglis Crack</i>	26
1.5. Zener-Stroh-Koehler Crack	27
1.6. Stress Fields of Zener-Stroh-Koehler Cracks	29
1.6.1. <i>Mode I Near Tip Stress Field</i>	30
1.6.2. <i>Mode II Near Tip Stress Field</i>	34
1.6.3. <i>Mode III Near Tip Stress Field</i>	35
1.7. Elastic Displacement Fields of Zener-Stroh-Koehler Cracks	35
1.7.1. <i>Mode I Near Tip Elastic Displacement Field</i>	36
1.7.2. <i>Mode II Near Tip Elastic Displacement Field</i>	36
1.7.3. <i>Mode III Near Tip Elastic Displacement Field</i>	36
1.8. Equilibrium Length of Zener-Stroh-Koehler Crack	37
1.8.1. <i>Short Zener-Stroh-Koehler Crack</i>	38
1.9. Equilibrium Length: ZSK Crack Subjected to an Applied Load	38
1.10. Energy of ZSK Crack Under an Applied Load	39
Chapter 1 Homework	42

**CHAPTER 2****Dislocation Mechanics**

<b>Dislocation Mechanics</b>	<b>45</b>
2.1. Dislocation Stress Fields: Rectangular Coordinates	45
2.1.1. <i>Glide Edge Dislocation</i>	45
2.1.2. <i>Climb Edge Dislocation</i>	46
2.1.3. <i>Screw Dislocation</i>	47
2.1.4. <i>Elastic Strain and Rotation Fields</i>	48
2.2. Dislocation Stress Fields: Cylindrical Coordinates	48
2.2.1. <i>Glide Edge Dislocation</i>	48
2.2.2. <i>Climb Edge Dislocation</i>	49
2.2.3. <i>Screw Dislocation</i>	49
2.3. Crack Plane Traction and Non-Traction Stress	49
2.3.1. <i>Crack Plane Traction Arising from a Crack Plane Dislocation Distribution</i>	49
2.3.2. <i>Crack Plane Non-Traction Arising from a Crack Plane Dislocation Distribution</i>	50
2.4. Force on a Dislocation	53
2.4.1. <i>Extrinsic Resistance (Friction) Stress <math>\tau_F</math> to Dislocation Motion</i>	54
2.4.2. <i>Intrinsic Resistance (Friction) Stress <math>\tau_i</math> to Dislocation Motion</i>	55
2.5. Dislocations and the $J$ Integral	55
2.6. Dislocation Crack Extension and Deflection Forces	58
2.6.1. <i>Dislocation Crack Extension Force</i>	58
2.6.2. <i>Dislocation Crack Deflection Force</i>	61
2.7. Dislocations Density Fields of Non-Redundant Dislocations	65
2.7.1. <i>Antiplane Strain</i>	66
2.7.2. <i>Plane Strain</i>	67
2.7.3. <i>Dislocation Density from Plastic Strain</i>	70
2.7.3.1. <i>Antiplane Strain</i>	70
2.7.3.2. <i>Antiplane Strain, Curvilinear Coordinates</i>	71
2.7.3.3. <i>Plane Strain</i>	74
2.7.3.4. <i>Plane Strain, Curvilinear Coordinates</i>	78
2.7.3.5. <i>Incremental Form</i>	80
2.7.3.6. <i>Strain Gradient Form Dislocation Density Field in Plane Strain</i>	81
2.8. Electrical Analogy	81
2.8.1. <i>Dislocation Analogue of Point Electrical Charge</i>	84
2.9. Dislocations, the Source of Internal Stresses	86
2.9.1. <i>General Dislocation Density Field</i>	87
2.9.2. <i>Lattice Curvature</i>	89
2.10. Edge Dislocation Stress-Strain-Rotation Field in Plane Stress	89
2.10.1. <i>Glide Edge Dislocation</i>	90

2.10.2. <i>Climb Edge Dislocation</i>	90
2.10.3. <i>Mode I Crack and Mode II Crack in an Elastic Foil</i>	91
2.10.4. <i>Dislocation Crack Extension Force &amp; Fracture Stress in Plane Stress</i>	92
2.10.5. <i>Screw Dislocation</i>	92
2.11. Dislocations Near and on an Interface	93
2.11.1. <i>Screw Dislocation</i>	93
2.11.2. <i>Glide Edge Dislocation</i>	93
2.11.3. <i>Climb Edge Dislocation</i>	94
2.11.4. <i>Comminou-Dundurs Equation</i>	94
Chapter 2 Appendix: Non-Traction Stress Jump Without(?) a Planar Dislocation Distribution	96
Test of the Rule	99
Chapter 2 Homework	99
<b>CHAPTER 3</b>	
<b>Hilbert Transforms &amp; Muskhelishvili Equations</b>	103
3.1. Hilbert Transforms	103
3.2. Muskhelishvili Equations	106
3.2.1. <i>Determination of Muskhelishvili Equations for a Single Zone</i>	107
3.3. Determination of the Distance $c$ to the Outer Crack Boundary	110
3.4. Summary of Equations for a Single Dislocation Zone	113
3.5. Solution When the Stress is Infinite at the Crack Tips	114
3.6. Non-Centered Coordinate System	116
3.7. Multiple Dislocation Zones	117
3.7.1. <i>Double Zone</i>	117
3.7.2. <i>Infinite Crack Tip Stress for Symmetric Double Zone</i>	121
3.7.3. <i>Symmetric Triple Zone</i>	122
3.8. Plane Stress	123
3.9. Resolution of a Hilbert Transform Paradox with Ghost Dislocation Distributions	123
Table 3.1	127
Chapter 3 Homework	131
<b>CHAPTER 4</b>	
<b>Bilby-Cottrell-Swinden-Dugdale (BCSD) Crack</b>	133
4.1. Bilby-Cottrell-Swinden-Dugdale (BCSD)	133
4.1.1. <i>Griffith-Inglis Crack Limit</i>	137
4.1.2. <i>Crack Extension force of BCSD Crack</i>	137
4.1.3. <i>Crack Tip Shielding of BCSD Crack</i>	138

4.1.4. <i>Mixed Mode I &amp; II BCSD Crack</i>	138
4.1.4.1. <i>Crack Extension Force</i>	138
4.1.4.2. <i>Crack Deflection Force</i>	138
4.2. <i>BCSD Type Zener-Stroh-Koehler Crack</i>	139
4.2.1. <i>Classical Limit of Zener Stroh-Koehler Crack</i>	141
4.2.2. <i>Stressed Zener-Stroh-Koehler Crack</i>	142
4.3. <i>Stress Fields of BCSD Cracks</i>	143
4.3.1. <i>Mode III BCSD Crack</i>	144
4.3.2. <i>Mode II BCSD Crack</i>	146
4.3.3. <i>Mode I BCSD Crack</i>	147
4.4. <i>Asymmetric Crack Solutions</i>	147
4.5. <i>Double Slip Plane Crack Model</i>	150
4.5.1. <i>Stationary Crack</i>	151
4.5.2. <i>Crack Tip Stress Intensity Factor</i>	154
4.5.2.1. <i>Short Short-Crack</i>	156
4.5.2.2. <i>Dislocation Crack Tip Shielding and Antishielding</i>	157
4.5.3. <i>Growing Crack</i>	158
4.5.3.1. <i>R-Curve</i>	159
Chapter 4 Homework	160
<b>CHAPTER 5</b>	
<b>Crack Tip Shielding and Antishielding by Dislocations</b>	163
5.1. <i>Dislocation Crack Tip Shielding and Antishielding</i>	165
5.1.1. <i>Screw Dislocations</i>	166
5.1.2. <i>Glide Edge Dislocations</i>	167
5.1.3. <i>Climb Edge Dislocations</i>	167
5.1.4. <i>Stress Intensity Factor <math>L</math> for an Individual Dislocation</i>	168
5.1.5. <i>Near Tip</i>	168
5.1.5.1. <i>Screw Dislocation</i>	168
5.1.5.2. <i>Glide Edge Dislocation</i>	168
5.1.5.3. <i>Climb Edge Dislocation</i>	168
5.1.6. <i>Far Crack</i>	169
5.1.6.1. <i>Screw Dislocation</i>	169
5.1.6.2. <i>Glide Edge Dislocation</i>	169
5.1.6.3. <i>Climb Edge Dislocation</i>	169
5.1.7. <i>Near Tip Radial Edge Dislocation</i>	170
5.1.8. <i>Near Tip Azimuthal Edge Dislocation</i>	170
5.1.9. <i>Comparison of <math>L</math> with Stress Fields of Griffith-Inglis and Zener-Stroh-Koehler Cracks</i>	173
5.1.10. <i>Placing a Discrete Dislocation within the Crack</i>	174
5.2. <i>Induced Crack Plane Dislocation Distribution <math>B(x)</math></i>	174
5.2.1. <i>Screw Dislocation Induced</i>	174

5.2.2. <i>Glide Edge Dislocation Induced</i>	176
5.2.3. <i>Climb Edge Dislocation Induced</i>	177
5.2.4. <i>Near Tip</i>	177
5.2.4.1. <i>Screw Dislocation Induced</i>	177
5.2.4.2. <i>Glide Edge Dislocation Induced</i>	178
5.2.4.3. <i>Climb Edge Dislocation Induced</i>	178
5.2.5. <i>Near Tip Radial Edge Dislocation Induced</i>	178
5.2.6. <i>Near Tip Azimuthal Edge Dislocation Induced</i>	179
5.3. <i>Stress on Crack Plane Ahead of Crack Tip</i>	179
5.3.1. <i>Screw Dislocation</i>	180
5.3.2. <i>Glide Edge Dislocation</i>	180
5.3.3. <i>Climb Edge Dislocation</i>	180
5.3.4. <i>Near Tip</i>	181
5.3.5. <i>Near Tip Crack Plane Dislocation arising from Near Tip Dislocation</i>	182
5.4. <i>Impurity Atom Crack Tip Shielding and Antishielding</i>	184
5.4.1. <i>Near Tip</i>	185
5.4.2. <i>Far Crack</i>	186
5.5. <i>Microcrack Shielding and Antishielding</i>	187
5.5.1. <i>Dislocation Dipoles</i>	189
5.5.1.1. <i>Horizontal Glide Edge Dislocation Dipole</i>	189
5.5.1.2. <i>Vertical Glide Edge Dislocation Dipole</i>	190
5.5.1.3. <i>Horizontal Climb Edge Dislocation Dipole</i>	190
5.5.1.4. <i>Vertical Climb Edge Dislocation Dipole</i>	191
5.5.1.5. <i>Horizontal Screw Dislocation Dipole</i>	191
5.5.1.6. <i>Vertical Screw Dislocation Dipole</i>	191
5.5.2. <i>Near Tip Stress Intensity Factors</i>	191
5.5.2.1. <i>Horizontal Glide Edge Dislocation Dipole</i>	192
5.5.2.2. <i>Vertical Glide Edge Dislocation Dipole</i>	192
5.5.2.3. <i>Horizontal Climb Edge Dislocation Dipole</i>	192
5.5.2.4. <i>Vertical Climb Edge Dislocation Dipole</i>	192
5.5.2.5. <i>Horizontal Screw Dislocation Dipole</i>	192
5.5.2.6. <i>Vertical Screw Dislocation Dipole</i>	193
5.6. <i>Crack Tip Blunting by Dislocation Emission</i>	193
5.6.1. <i>Rice-Thomson Model</i>	193
5.6.2. <i>Model Based on Muskhelishvili Type Analysis</i>	195
5.6.3. <i>Crack Tip Blunting</i>	198
Chapter 5 Homework	199
<b>CHAPTER 6</b>	
<b>Mode III Crack in an Elastic-Plastic Solid</b>	201
6.1. <i>Mode III Crack in an Elastic Perfectly Plastic Solid</i>	201
6.1.1. <i>Stress Field</i>	202

6.1.2. <i>Strain Field</i>	206
6.1.3. <i>Dislocation Crack Extension Force and the Plastic Zone Size</i>	207
6.1.4. <i>Crack Tip Shielding</i>	207
6.1.5. <i>Crack Plane Dislocation Distribution</i>	208
6.1.6. <i>Elastic Region Stress Field</i>	208
6.1.7. <i>Boundary Conditions Summary</i>	210
6.2. Stationary Crack in a Work Hardening Solid in Small Scale Yielding	211
6.2.1. <i>Stress Solution</i>	212
6.2.2. <i>Strain Solution</i>	214
6.2.3. <i>Dislocation Density Field</i>	214
6.2.4. <i>Slip Trajectories</i>	214
6.2.5. <i>Plastic Strain from Dislocation Density Field</i>	217
6.2.6. <i>Dislocation Crack Tip Shielding</i>	220
6.2.7. <i>Dislocation Crack Extension Force</i>	220
6.2.8. <i>Crack Plane Dislocation Density Distribution</i>	221
6.2.9. <i>Net Burgers Vector of Plastic Zone Dislocations</i>	222
6.3. Mode III Crack in a Linear Work Hardening Solid with Zero Yield Stress	222
6.3.1. <i>Stress Solution</i>	223
6.3.2. <i>Maximum Shear Stress Plane Trajectories</i>	224
6.3.3. <i>Dislocation Density</i>	225
6.4. Mode III Crack in an Elastic Perfectly Plastic Solid in Large Scale Yielding	226
6.4.1. <i>Approximate Solution</i>	227
6.4.2. <i>Special Problem</i>	228
6.4.3. <i>Exact Solution</i>	230
6.4.3.1. <i>'Pressurized' Mode III Crack</i>	235
6.5. Growing Mode III Crack in an Elastic Perfectly Plastic Solid	236
6.5.1. <i>Chitaley-McClintock Asymptotic Region</i>	238
6.5.2. <i>Strain Field in CM Sector</i>	239
6.5.3. <i>Strain Field in DH Sector</i>	242
6.5.4. <i>Approximate Solution</i>	243
Chapter 6 Appendix: Iterative Solution of Special Problem	249
Chapter 6 Homework	256
<b>CHAPTER 7</b>	
<b>Mode II Crack in an Elastic-Plastic Solid</b>	259
7.1. Mode II Crack in an Elastic Perfectly Plastic Solid in Small Scale Yielding	259
7.1.1. <i>Plastic Zone Stress Field</i>	260
7.1.2. <i>Asymptotic Dislocation Density Field</i>	262
7.1.2.1. <i>Asymptotic Dislocation Density Field from Stress Field</i>	265
7.1.2.2. <i>Asymptotic Dislocation Density Field from Strain Field</i>	265
7.1.3. <i>Plastic Zone Strain-Rotation Field and Dislocation Density Field</i>	266

7.1.4. Plastic Zone Shape	268
7.1.4.1. Dislocation Crack Extension Force and the Plastic Zone Size	270
7.1.4.2. Dislocation Crack Tip Shielding	270
7.1.5. Crack Plane Dislocation Distribution	273
7.1.6. Elastic Region Stress Field	275
7.1.6.1. Constant Stress Magnitude Contours	279
7.2. Mode II Crack in a Linear Work Hardening Solid with Zero Yield Stress	282
7.2.1. Stress Solution	283
7.2.2. Maximum Shear Stress Plane Trajectories	284
7.2.3. Rotation	285
7.2.3.1. A Physical Inconsistency	285
7.2.4. Solution without Reversed Slip	286
7.2.4.1. Dislocation Density Field	286
Chapter 7 Homework	289
<b>CHAPTER 8</b>	
<b>Mode I Crack in an Elastic-Plastic Solid</b>	291
8.1. Mode I Crack in an Elastic Perfectly Plastic Solid in Small Scale Yielding	291
8.1.1. Mode II Analogue Plastic Zone Stress Field	292
8.1.2. Asymptotic Dislocation Density Field	293
8.1.3. Plastic Zone Stress Field: Mode I Crack in an Elastic Perfectly Plastic Solid Dislocation Density Field	299
8.2. Dislocation Density Field	304
8.2.1. Strain-Rotation Field	306
8.2.1.1. Stream Functions and Displacement Fields	306
8.2.1.2. Strain-Rotation Field	307
8.2.2. Dislocation Density Field	308
8.3. Dislocation Crack Extension Force	309
8.3.1. Transformed Dislocation Density Components	310
8.3.2. Transformed Stress Components	310
8.4. Dislocation Crack Tip Shielding	310
8.4.1. Trajectory Equations	311
8.5. Crack Plane Dislocation Distribution	316
8.6. Elastic Region Stress Field	316
8.6.1. Constant Stress Magnitude Contours	319
8.7. Mode I Crack in a Linear Work Hardening Solid with Zero Yield Stress	322
8.7.1. Stress Solution	322
8.7.2. Maximum Shear Stress Plane Trajectories	323
8.7.3. Rotation	324
8.7.3.1. A Physical Inconsistency	324
8.7.4. Solution without Reversed Slip	325

8.7.4.1. <i>Dislocation Density Field</i>	325
8.7.5. <i>Dislocation Density Field Found from Plastic Strain Field</i>	327
8.8. Hutchinson-Rice-Rosengren (HRR) Stress-Strain Field	329
8.8.1. <i>Boundary and Symmetry Conditions</i>	330
8.8.2. <i>HRR Stress Field</i>	332
8.8.3. <i>HRR Strain Field</i>	333
8.8.4. <i>HRR Strain-Strain Field for a Special Case</i>	334
8.8.5. <i>Dislocation Density Field of the HRR Stress-Strain-Rotation Field</i>	337
8.8.6. <i>Dislocation Density Condition</i>	338
8.8.7. <i>Exponent Condition</i>	339
8.9. Mixed Mode I & II Stationary Crack in an Elastic Perfectly Plastic Solid	342
8.9.1. <i>Shih Asymptotic Stress Field</i>	342
8.9.2. <i>Asymptotic Stress Field with Sector Below Yield Stress</i>	344
Chapter 8 Homework	348
<b>CHAPTER 9</b>	
<b>Moving Yoffe Crack</b>	351
9.1. Dislocation Stress Fields	351
9.1.1. <i>Uniformly Moving Screw Dislocation Stress Field</i>	352
9.1.2. <i>Uniformly Moving Glide Edge Dislocation Stress Field</i>	352
9.1.3. <i>Uniformly Moving Climb Edge Dislocation Stress Field</i>	353
9.1.4. <i>Dislocation and Crack Plane Traction Stresses</i>	354
9.2. Stress Fields of Moving Yoffe Cracks	356
9.2.1. <i>Mode I Crack</i>	357
9.2.2. <i>Mode II Crack</i>	357
9.2.3. <i>Mode III Crack</i>	358
9.2.4. <i>Mode I Near Tip Stress Field</i>	358
9.2.5. <i>Mode II Near Tip Stress Field</i>	359
9.2.6. <i>Mode III Near Tip Stress Field</i>	359
9.2.7. <i>Plane of Maximum Tensile Stress at Mode I Crack Tip</i>	360
9.2.7.1. <i>Yoffe Crack Branching</i>	361
9.2.8. <i>Plane of Maximum Tensile and Shear Stress at Mode II Crack Tip</i>	365
9.2.9. <i>Plane of Maximum Shear Stress at Mode III Crack Tip</i>	370
9.3. Dislocation Density Field Equations	370
9.3.1. <i>Antiplane Strain</i>	371
9.3.2. <i>Plane Strain</i>	372
Chapter 9 Homework	372
<b>CHAPTER 10</b>	
<b>Interesting Applications</b>	373
10.1. Crevasses and Dikes	373

10.1.1. <i>Crevasses</i>	373
10.1.2. <i>Propagation of Magma Filled Cracks</i>	379
10.1.3. <i>Dikes</i>	380
10.2. Unstable Slippage	382
10.3. Edge Cracks in Elastic Solids	385
10.4. Interface Cracks	391
10.5. Fatigue Crack Propagation	398
10.5.1. <i>Fatigue Crack Growth Controlled by Crack Tip Blunting</i>	398
10.5.2. <i>Paris Law</i>	399
10.6. Redundant and Non-Redundant Dislocations	402
10.6.1. <i>Irwin-Orowan Fracture Equation</i>	405
Chapter 10 Appendix: Stress Field of a Mode I and of a Mode II Interface Crack	407
Chapter 10 Homework	413
<b>APPENDIX A</b>	
<b>Short Table of Hilbert Transforms</b>	417
<b>APPENDIX B</b>	
<b>Table of Useful Integrals for Crack Problems</b>	420
<b>APPENDIX C</b>	
<b>Stress Fields of Dislocations Near or On an Interface</b>	439
C.1. Screw Dislocation	439
C.1.1. <i>Discrete Image Screw Dislocations</i>	439
C.1.2. <i>Image Screw Interface Dislocation Distributions</i>	441
C.2. Glide Edge Dislocation	442
C.2.1. <i>Continuity Conditions</i>	443
C.2.2. <i>Real Dislocation and Set I of Image Dislocations</i>	443
C.2.3. <i>Set II of Image Dislocations</i>	445
C.2.4. <i>Shear Stress Continuity</i>	446
C.2.5. <i>Normal Stress Continuity</i>	447
C.2.6. <i>Normal Displacement Continuity</i>	448
C.2.7. <i>Tangential Displacement Continuity</i>	449
C.2.8. <i>Constants</i>	450
C.3. Climb Edge Dislocation	451
C.4. Dislocation at the Interface	451
C.4.1. <i>Screw Dislocation</i>	451
C.4.2. <i>Glide Edge Dislocation</i>	451

C.4.3. <i>Climb Edge Dislocation</i>	453
C.5. Comninou-Dundurs Equations	453
C.6. Inverse Comninou-Dundurs Equations	454
<b>APPENDIX D</b>	
<b>Table of Useful Equations</b>	455
D.1. Stress and Strain Components	455
D.1.1. <i>Cartesian Coordinates</i>	456
D.1.2. <i>Cylindrical Coordinates</i>	456
D.1.3. <i>Finger and Thumb Coordinates</i>	456
D.1.4. <i>Strain Compatibility Condition for Plane Strain</i>	457
D.2. Elastic Constants	458
D.3. Stress and Strain Components in Rotated Coordinate System	458
D.4. Conditions for Antiplane Strain, Plane Strain and Plane Stress	460
D.5. Equations for Dynamics Equilibrium	461
D.6. Non-Redundant Dislocation Density Field	462
D.6.1. <i>Cartesian Coordinates</i>	462
D.6.1.1. <i>Frank's Rule</i>	463
D.6.2. <i>Cylindrical Coordinates</i>	463
D.6.2.1. <i>Frank's Rule</i>	464
D.6.3. <i>Spherical Coordinates</i>	464
D.6.3.1. <i>Frank's Rule</i>	465
D.6.4. <i>Dislocation Density Relationships and Strain Compatibility Equations</i>	465
D.6.4.1. <i>Beltrami-Michell (Strain) Compatibility Equations</i>	465
D.7. Stress-Strain-Rotation Displacement Fields in Plane Strain from Stress and Strain Functions	466
D.7.1. <i>Airy Stress Function</i>	466
D.7.2. <i>Displacement and Rotation Field</i>	466
D.7.3. <i>Stream Function</i>	466
D.7.4. <i>Antiplane Strain Stress Function</i>	467
D.8. The Del Divergence, Curl and Gradient Operators	467
D.8.1. <i>Cartesian</i>	467
D.8.2. <i>Cylindrical</i>	467
D.8.3. <i>Spherical</i>	467
D.8.4. <i>Cylindrical, Shifting Center</i>	468
D.9. Equations of Static Equilibrium in Shifting Center Cylindrical Coordinate System	468
D.9.1. <i>Antiplane Strain</i>	468
D.9.2. <i>Plane Strain</i>	468

D.10. Trigonometric Relationships	469
D.11. Dirac Delta Functions	470
D.11.1. <i>One Dimension</i>	470
D.11.2. <i>Two Dimensions</i>	470
D.11.3. <i>Three Dimensions</i>	470
D.11.4. <i>One Dimension, Special Example</i>	471
D.12. Curves	472
D.13. Surface Dislocation Density Tensor	472
D.14. Single Stress Component - Dislocation Density Relationships	474
D.14.1. <i>Plane Strain</i>	474
D.14.2. <i>Antiplane Strain</i>	474
<b>APPENDIX E</b>	
<b>Derivation of the Del Gradient and other Operators for the Shifting Center Cylindrical Coordinate System</b>	475
<b>APPENDIX F</b>	
<b>Orthogonal Curvilinear Coordinates</b>	481
F.1. Curvilinear Coordinates	481
F.1.1. <i>Exponential Spirals</i>	482
F.1.2. <i>Non-exponential Spiral</i>	484
F.2. Static Equilibrium Equations	487
F.2.1. <i>Plane Strain</i>	487
F.2.2. <i>Antiplane Strain</i>	493
F.3. Gradient $\nabla_{\text{grad}}$ , Divergence $\nabla_{\text{div}}$ and Curl $\nabla_{\text{curl}}$ Operators	493
<b>APPENDIX G</b>	
<b>Dislocations in Stress Space</b>	495
G.1. Cracks in Elastic Stress Space	498
